SCHEDULE D

Applicable to each subsection category above which specifies that it is subject to the regression schedule set forth in Schedule D:

License Rate Regression: License rates as above scheduled shall be applied regressively in accordance with the following schedule:

Percent of License Rate to be Applied to Gross Revenues-

100%... To 1st million dollars or portion thereof

80%... To 2nd million dollars or portion thereof

60%... To 3rd million dollars or portion thereof

40%... To 4th million dollars or portion thereof

20%... To all amounts in excess of 4 million dollars

Example of How to Calculate License: Gross Receipts Reported by taxpayer \$3,000,000.00

100% of the 1st Million = \$1,000,000.00,

80% of the 2nd Million = \$800,000.00,

60% of the 3rd Million = \$600,000.00

Total the balances which equal \$2,400,000.00. You will then use this figure, \$2,400,000.00, to calculate the license fee due.

$\$2,400,000.00$ minus $\$150,000.00 = \$2,250,000.00 \times 0.002093$ (or figure indicated per schedule) =
 $\$4,709.25$ plus base fee of $\$300.00$ (or amount indicated per schedule) = total license due of $\$5,009.25$ plus issuance fee.
